# THE FIRST AND ONLY MISSION-CRITICAL ECOSYSTEM

Motorola Solutions has created the mission-critical ecosystem built for public safety. It shares knowledge across your entire operation to enable powerful collaboration, streamline workflows and drive performance. A single platform — where communications, software, video and services operate seamlessly together — to reveal the insights which drive meaningful change.

# **VIDEO SECURITY & ACCESS CONTROL**

KNOW WHAT IS HAPPENING. ACT WITH CERTAINTY.

Our expansive portfolio of cameras, access control, infrastructure and management software is combined with powerful, AI-enabled analytics that take your video system from passive observer to active partner.

With high-definition cameras that continuously scan, analyze and learn from their environment, you get unprecedented visual detail combined with situational awareness to inform the best response. Investigations that once took hours or days, now take minutes with advanced search capabilities and integrations across the ecosystem that enable effortless sharing and collaboration.

At Motorola Solutions, we create a safe world.

# CAPTURE EVERY INCIDENT. RECORD EVERY ENCOUNTER.

### SOLUTIONS FOR LAW ENFORCEMENT

Video is a vital technology for public safety agencies around the world. Whether you use it to maintain security, identify suspects, gather evidence or initiate a response, having eyes on the scene is an important advantage to your team. Motorola Solutions maintains a comprehensive portfolio of video solutions, including the storage, management and analytics applications you'll need to fully utilize your new streams of intelligence. From body-worn cameras to fixed infrastructure. From thermal cameras to access control, we have the solutions that can help you keep your community safer.

# **BODY-WORN CAMERAS**

For modern public safety professionals, body-worn cameras have become almost as important as two-way radios. To improve accountability, discourage frivolous lawsuits and maintain the trust of the community, it's critical that your officers capture video records of their interactions with citizens. The VB400 is a high-performance ruggedized camera, available worldwide outside of North America, that offers multiple options for connection and customization.

### **VB400 CAMERAS**

### AVAILABLE FOR PUBLIC SAFETY USE GLOBALLY OUTSIDE OF NORTH AMERICA

Offers public safety professionals a ruggedized, feature-rich recording device designed for those on the front line. Both WiFi- and Bluetooth-enabled, the VB400 is optimized to perform when it matters most.

Simultaneously manage up to 84 body-worn cameras while also assigning them to operators using VideoManager software

### **SPECIFICATIONS**

-- 0

MODEL NAME		DOCKCONTROLLER
PART NUMBER		DC-200/ B
	Typical Usage	Connected to VideoManager over Ethernet, with multiple docks attached via USB
General Information	Management Software	VideoManager
	Warranty	1 year return to manufacturer warranty
Size & Weight	Dimensions (H x W x D)	6.1 x 5.3 x 1.5 in (154 x 136 x 37 mm)
Size & Weight	Weight	23.3 oz (660 g)
Scalability	Body-Worn Camera Support	Connect up to 84 body-worn cameras to one DC-200. Ideal for use with 14-port docks. Can also be used with up to 4 individual 1-port docks.
	Unlimited VideoManager Connectiity	There is no limit on the number of DC-200s that can be connected to an instance of VideoManager
	Operating Temperature	32 to 104 °F (0 to 40 °C)
	Storage Temperature	-67 to +158 °F (-55 to +70 °C)
Technical Specifications	Input Voltage (to supplied external power supply)	100 - 240V, 47 - 63Hz
	Maximum Power Consumption	20W
	High-Speed Footage Downloads	Gigabit Ethernet Port (1000/100/10 mbps) for rapid footage download and body-worn camera assignment
	RFID-Compatible	Attach an RFID reader to one of the DC-200's USB ports to enable quick body-worn camera assignment
Connectivity	Bandwidth Restrictions	Apply bandwidth rules to individual DC-200s to control how much footage is uploaded to VideoManager, and when
	High-Priority Configuration	Prioritize certain DC-200s to ensure that their footage is downloaded to VideoManager first
	Slow Connection Configuration	DC-200s with this setting enabled will continuously try to offload footage to VideoManager, ignoring the bandwidth limit
	Shared Bandwidth Groups	Add multiple DC-200s to one bandwidth group to ensure that the bandwidth limit is shared equally between them

### **KEY FEATURES**

Connect up to 84 Body-Worn Cameras

# VIDEO & CAMERA MANAGEMENT SOFTWARE

To keep your fleet of body-worn and in-car cameras operating at peak efficiency, you'll need a system management platform. You'll need to be able to assign ownership, change settings, update firmware and manage permissions on your devices before you can send them out to capture video. And capturing video is just the start. Once you have that footage, you'll need to upload it, store it, categorize it, redact it, share it and archive it. That's why you need powerful software behind your cameras.

### **VIDEOMANAGER SOFTWARE**

### SUPPORTS VB400 BODY-WORN CAMERAS

Browser-based system for management of users and devices as well as the managing, storing and sharing of digital evidence.

### **SPECIFICATIONS**

	Granular Permissions	Users can only access the parts of the VideoManager interface which are relevant to their workflow.
Workflow Control	Granular Sharing	Incidents and videos can be automatically or manually shared between users and groups on VideoManager. Instances can be shared with workers who are not on VideoManager, using time-sensitive links or exports.
	Permissions Overview	Administrators can see permissions associated with a user, and how they got those permissions.
	Priviledge Escalation	Authorized users can temporarily elevate their priviledges for a limited time, in order to perform certain actions on VideoManager.
	Deletion Policies	Configure how long footage is kept on VideoManager before it is deleted.
	Automatic DockController Firmware Upgrades	Ensure your suite of DockControllers always have the latest firmware, eliminating manual upgrades. Configure a specific timeframe for DockController firmware upgrades, to minimize workflow disruption.
	Comprehensive Audit Trail	A comprehensive audit log of every action performed in the system is created. Users can create and download audit logs to view these actions if necessary.
Security	Access Control Keys	Without a device's access control key, undownloaded footage on a device is inaccessible.
	File Space Encryption	Footage, report and export filespaces are automatically encrypted for extra security.
	Bulk Edit	Large numbers of events can be instantaneously deleted or added to incident collections. Large numbers of body-worn cameras can be assigned or upgraded in parallel.
Qualability.	User Groups	Put multiple users in a group for sharing and management purposes. Groups can be supervised by individual users, or other groups.
Scalability	Reports Creation	Download reports detailing various aspects of VideoManager acitivity e.g. when devices were docked and undocked.
	Live Statistics	View real-time statistics with information about how VideoManager is being used.
Technical	Compatible Server Platforms	Windows Server 2016 Essentials, Standard and Datacenter, Windows Server 2012 R2 Essentials, Standard and Datacenter, Windows Server 2012 Essentials, Standard and Datacenter, Windows 10 Pro and Enterprise and Windows 8.1 Pro and Enterprise
Specifications	Compatible Client Browsers	Microsoft Internet Explorer 11 (Windows 7/8.1/10), Microsoft Edge 14+ (Windows 10), Firefox 47+ (Windows 10), Chrome 48+ (Windows 7/8.1/10, MAC OS X v10.10)

### **CONNECTIVITY FEATURES**

- Integrates with ACC video management software (via ONStream technology)
- Can be enabled as a central VideoManager, to which other instances of VideoManager ("sites") can be connected
- Connect VideoManager to CommandCentral Vault, for footage storage and correlation with other CommandCentral Suite applications<sup>1</sup>
- Group footage and other important media in an incident for ease of view

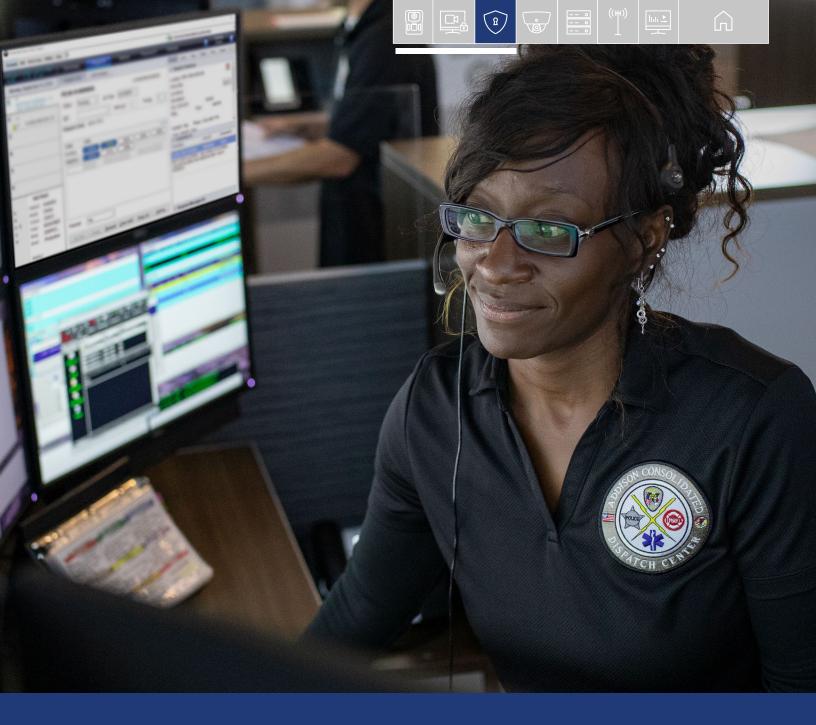

#### **EVIDENCE PREPARATION FEATURES**

- Put multiple incidents in an incident collection for sharing and management purposes
- Redact footage and images using effects like bluring, pixelation and highlighting. Audio, text and zoom redactions are also available
- Non-video media (PDFs, MP4s, JPGs), and videos which were not recorded using VT100 or VB400 can be imported to VideoManager and added to incidents

#### LEARN MORE

\*Requires CommandCentral Vault subscription.

The Motorola Solutions Access Control Manager (ACM) system is a physical access control system for largedeployment installations, designed to help you focus on securing your people, property and assets — even those that span across a large perimeter — while giving you the flexibility to respond to alerts wherever you are. It seamlessly integrates with ACC software to provide you with a powerful and unified security solution that helps you proactively monitor and secure your sites.

# **ACM 6 SOFTWARE**

Access Control Manager (ACM) is a physical access control system for enterprise-class installations, designed to protect people, property and assets with advanced alarm and identity management providing superior control of access to facilities. This 100% browser-based solution offers the flexibility to respond to alerts from anywhere. ACC unification offers a powerful end-to-end security solution to monitor and secure sites.

### **DETAILS**

Integrated Badging	
integrated badging	Ability to design and print badges from within the ACM Browser.
Collaborations	Collaboration provides the ability to exchange data between the access control appliance application and a large number of other database types (e.g., LDAP, SQL Server, Oracle RDBMS, CSV imports, Generic XML, REST API Tools).
Identity Correlation Report	Contact tracing tool to help verify identities that may be at risk by having close contact with infected individuals.
Event Correlation & Alarm Monitoring	Alarm management workflow, with visual representations of alarms using color-based priority indicators, audible alerts, the ability to view live and recorded video, append notes, receive instructions, acknowledge and clear alarms.
Integrated Video & Mapping Interface	Automated alarms generated by ACM can be viewed on a map and linked to the associated live or recorded video stream from ACC software.
Email Notifications	Receive automatic email notifications of access control events.
Identity Mustering	This interactive tracker can pinpoint missing personnel quickly with a real-time visual display of where people are at all times based on their badging activity.
Controllers & Sub-Panels	Protect and future-proof your access control investment by using open-field hardware from leading manufacturers.
Intrusion Detection	Integration to intrusion detection systems to automate the management and control within the ACM system.
Wireless Locks	Integration with leading third-party wireless lock vendors.
Biometric Readers	Integration to biometric fingerprint reader technology.
pivCLASS	Integration with HID® pivCLASS® technology when implemented in an HSPD-12 environment requiring FIPS 201-2 evaluation program approval.
Video Security	Unification with ACC software and integration with other third-party video management software to better inform responses with video context.
Turnkey Operation	Easy installation experience with server appliances that are ready to go the moment you plug them in.
Templates	Wide selection of easy-to-use templates for doors and wiring for faster configuration.
Customized Reporting	Pre-defined, ready-made reports that can be customized to display important access control data.
Peer-to-Peer Replication	Patented technology that allows for replication of identity data on multiple appliances across many sites. This embedded technology requires no additional software or hardware and simplifies identity management, promotes consistency of identity data and reduces data entry efforts.
Scalable Deployment Model	ACM appliances allow you to start with what you need on individual appliances, then expand by adding doors and replicating to additional appliances as your organization grows.
Mobile App	ACM Expedite provides quick and easy access to pre-configured global actions, allowing operators on-the-go to swiftly perform daily operations such as unlocking a door, and responding to critical events such as a sitewide lockdown – all from their mobile device.
	Identity Correlation Report         Event Correlation & Alarm Monitoring         Integrated Video & Mapping Interface         Email Notifications         Identity Mustering         Identity Mustering         Controllers & Sub-Panels         Intrusion Detection         Wireless Locks         Biometric Readers         pivCLASS         Video Security         Turnkey Operation         Templates         Customized Reporting         Peer-to-Peer Replication         Scalable Deployment Model

8

### **KEY FEATURES**

The Avigilon Access Control Manager (ACM) system is designed to keep your focus on securing people, property and assets, and maximize your time by helping you respond immediately to alerts wherever you are. The ACM<sup>™</sup> system is 100% browser-based, requiring no software installation. Deploying hardened linux-based appliances, we use openfield hardware to leverage a breadth of standardized products from trusted manufacturers for different solutions to uniquely fit customer needs. It also supports third party integrations through our RESTful API. The ACM system leverages an open architecture, integrates identity management and video surveillance such as ACC video management software and achieves a high level of scalability with a low cost of ownership. It delivers a ready-to-deploy solution that provides the performance you expect from an enterprise-class solution.

### **LEARN MORE**

<sup>1</sup> System recommendations.

### **HARDWARE & INTEGRATIONS**

### **CONTROLLERS & SUB-PANELS**

With hardware options for small to enterprise level systems, deploying and managing your ACM system has never been more intuitive and flexible as it is today.

8

### **INTRUSION PANELS**

Centrally monitor and control Bosch intrusion panels and access events from the ACM system for visual verification of alerts and faster responses. Operators can arm and disarm panels by area, set-up and assign passcode groups to identities, configure the system to send access events to the central monitoring service and more.

### **READERS & CREDENTIALS**

The ACM system offers trusted and secure door readers and multipurpose credential cards to keep security at the forefront of your facility.

### WIRELESS LOCK INTEGRATIONS

The ACM system seamlessly integrates with third-party wireless locks for you to combine all of the components of an access controlled door into a simplified all-in-one system that saves time and costs.

### **BUNDLED KITS**

The ACM Bundled Kits come with everything needed to connect up to 16 doors of access.

### FEDERAL GOVERNMENT SOLUTIONS

The ACM system is FIPS 201-2 compliant and is a certified solution on the GSA Approved Product List (APL), meeting the Personal Identity Verification (PIV) requirements mandated for U.S. federal employees and contractors. Customers can conveniently and reliably purchase all components of this fully compliant, GSA-approved FICAM solution directly from Motorola Solutions.

**LEARN MORE** 

### **BIOMETRIC SOLUTIONS**

The integration of ACM with ViRDI's biometric fingerprint reader technology provides further safeguards to high security environments with an extra form of identification.

### **VISITOR MANAGEMENT**

ACM integrates with HID Global's EasyLobby Secure Visitor Management software, which allows organizations to automate the entire process of registering a visitor, printing a badge and capturing detailed information in seconds by simply scanning an ID.

### **POWER SUPPLIES**

High-efficiency, cost-effective power supplies from LifeSafety Power and Elmdene provide all the power needed for up to 16 doors.

### ACM VERIFY VIRTUAL STATIONS

ACM Verify allows any browser-enabled smart device to act as a virtual station. It works by recording and confirming an individual's identity using a PIN code, enabling you to extend the capability of your access system to locations where physical access doors are not feasible.

# SMART VIDEO SOLUTIONS ENABLE A FASTER RESPONSE

### **SOLUTIONS FOR COMMUNITY VIDEO SECURITY**

The right technology is critical to law enforcement's success in safeguarding business investments within the community and protecting citizens.

Law enforcement agencies across local, state and county levels need to do more with less in order to effectively secure densely populated areas that often span across a large perimeter. With so much at stake, the ability to monitor potential threats in real time and leverage the power of intelligent forensic video tools could make all the difference in preventing crime and protecting citizens within their community.

# **FIXED CAMERAS**

Motorola Solutions offers a complete video security solution with cutting-edge camera and sensor technologies that are embedded with features like smart analytics, to focus your attention on the important details that help you solve crimes. From traffic enforcement and city surveillance to crime prevention and community protection, assistive AI on board intelligent cameras can help improve response times in the moments that matter most. Infrared (IR) and LightCatcher<sup>™</sup> technology help you see more in dark environments, while a 360-degree view for broad coverage with fewer cameras can help to maximize scene coverage for better situational awareness.

# **H5 PRO CAMERAS**

The new Avigilon H5 Pro Camera Line captures the best-in-class image details over vast areas, providing maximum coverage options through our most powerful and innovative ultra high definition cameras yet.

## VIDEO INFRASTRUCTURE

Whether you need a few cameras to monitor strategic areas of your precinct or thousands of cameras to monitor city streets and transportation hubs, using a complete Avigilon solution helps take the risk out of deployment and maintenance. Avigilon Network Video Recorders (NVRs) and appliances are pre-configured for enhanced system performance and to save you time during deployment.

## **NVRS & WORKSTATIONS**

All models come with high-performance recording technology, a three-year Avigilon warranty with dedicated support and added features for your security needs.

# ((++)) ENTERPRISE-GRADE PRIVATE BROADBAND

Nitro by Motorola Solutions is the first fully-managed Citizens Broadband Radio Service (CBRS) platform that combines private broadband data with business-critical voice, delivering enterprise-grade private LTE that is easy-to-deploy and outperforms Wi-Fi. Nitro's integration with Avigilon video security cameras provides large, remote or dense sites with greater video coverage, reliable performance, and robust data security and privacy.<sup>\*</sup>

## **NITRO**

Designed to be deployed like a Wi-Fi network, Citizens Broadband Radio Service Devices (CBSDs) are mounted in desired locations and connected to other network gear typically racked in a central location. Avigilon camera connectivity into a Nitro network requires a fixed, third-party OnGo device containing a Nitro SIM card to gain network access and bridge the camera's ethernet communication capability with the network's CBRS wireless protocol.

#### **SYSTEM COMPONENTS**

DEVICE IMAGE	DEVICE NAME	DEVICE TYPE	PART NUMBER	DESCRIPTION
	SLX 2000	CBSD (Access Point)	AAE20048ENA1AN	Indoor CBSD 3550-3700M 250mW Includes: CBSD with 64 active stream support, wall/ceiling mount hardware, integrated 8dBi antenna, copper ethernet or fiber backhaul, POE++ or 12V DC input, integrated GPS receiver, PTP license.
· · ·	SLX 4000	CBSD (Access Point)	AAE40048ENB2AN	Outdoor CBSD 3550-3700M 316mW. Includes: CBSD with 64 active stream support, pole/wall mount hardware (including adapter bands), copper ethernet backhaul, DC -40 to -57V, 10m DC power cable, GPS antenna for direct mount.
	SLN 1000	Two-Way Radio	HK2120A	Purpose-built CBRS radio, delivering highly reliable broadband push-to-talk. Featuring a built-in Wi-Fi hotspot, the SLN 1000 helps you get the most out of legacy radio equipment, while taking advantage of CBRS mobility and security.
	JUNIPER SRX 345 FIREWALL	Firewall/Router (two (2) required)	T8577A	All Nitro networks require a minimum of one (1) SRX 345 for connectivity to the Nitro Cloud Core. Connection will be through the customer-provided Internet connection. Redundant links and/or redundant configurations are supported, additional switching not included.
	HPE ProLiant DL20 Gen10 Server	OnPrem Edge Gateway	SQM01SUM0319A	Includes: Nitro On-Prem Edge Gateway hardware (HP DL 20 appliance), NA AC power cord, and software. If redundancy or expansion is required, order a quantity of two.
	uFalconSTG PTP Bundle	PTP Timing Source	DSBNDLMS12	Includes: uFalconSTG PTP, AC/DC Power Adapter, and a rack mounting shelf. All Nitro CBSDs require a timing source, either PTP or GPS. The uFalconSTG PTP provides PTP timing for up to 32 CBSDs, AC/DC power adapter and the rack mounting shelf items detailed below.
N/A	Expansion uFalconSTG PTP with AC/DC adapter	PTP Bundle	DSBNDLMSI21	Includes: PTP server with the AC/DC power adapter and is appropriate when a second co-located PTP server is required (i.e. expansion or redundancy).
N/A	EDGE TIMING MASTER	PTP Accessories	DSMFALCONST8SEGHOC	This is an expansion uFalconSTG PTP server that can be purchased to have redundancy in a network, if a network is being expanded beyond 32 CBSDs or if a spare PTP server is desired. The DSBNDLMSI2 bundle already includes a uFalconSTG PTP server.

\*Nitro parts are sold by Motorola Solutions. To resell Nitro, an Avigilon Partner must apply to become a Motorola Solutions Partner: partnerapply.motorolasolutions.com

<sup>1</sup> Avigilon has tested up to the number indicated, however no limits are imposed by licensing. Actual limits will depend on the hardware environment. ONVIF is a trademark of ONVIF, Inc.

## **ACC 7 SOFTWARE**

#### **STANDARD FEATURES**

- Automatic device discovery
- Support for third-party ONVIF compliant cameras and encoders including dual streaming
- Support for H.265, H2.654, MPEG4, MJPEG and JPEG2000 codecs
- HDSM<sup>™</sup> and HDSM SmartCodec<sup>™</sup> technology support
- ACC Mobile application
- Video analytics overlays
- Light and dark user interface themes
- Unusual Motion and Activity Detection timeline filtering with Skip Play

• Intelligent Motion, thumbnail and event search

lun ≵

- Two-factor authentication and emergency privilege override
- Two-person authenticated recorded video viewing
- Avigilon Cloud Services web client
- FIPS 140-2 encryption
- Occupancy Counting analytics
- Social Distancing analytics
- Multi-camera export
- System & motion event email notifications

## **AVIGILON CLOUD SERVICES**

The Avigilon Cloud Services (ACS) platform connects your ACC sites to the cloud and enables secure access to your system from anywhere using an internet browser. Operators can review live and recorded video as well as monitor the health of all cloud-connected ACC sites, including critical components such as cameras and servers.

#### **SPECIFICATIONS**

Centralized Access	Anywhere Access	Organizations with distributed locations can easily access their ACC sites securely from anywhere on a browser or mobile device.
	Easy Remote Access	Remotely monitor multiple locations and cameras to quickly detect, verify and act on events.
	Cloud Connectivity to ACC Sites	Connect ACC sites to the cloud to converge media access, system management, and integrations.
	Tools for everyday operation	Access live and recorded video, create and view bookmarks, manage PTZ controls, and export videos to a local drive.
	Enhanced Situational Awareness	Provides timely and proactive responses to analytic alarms, sent from ACC software as push notifications directly to the ACC Mobile 3 app.
Security	Firewall Traversal	Firewall traversal enables secure remote access with minimal or no firewall reconfiguration.
	Federated Authentication	Centralize administration of user identities and use corporate credentials to access ACC, ACM and ACS software.
	Seamless User Provisioning	Provisioning users is simple, as existing ACC group privileges are inherited for web client or mobile app viewing.
System Health Monitoring	Real-time Awareness	Confirm the operational status of your deployment to prioritize site maintenance activities and optimize uptime across all system components.
	Health Dashboard	Review a single health dashboard that rolls up the active status of all recorders and connected cameras.
	Remote Configuration Access	Access configuration details of recorders and cameras across all cloud-connected ACC sites.
	Remote Site Upgrades	Push software upgrades remotely to one or more ACC sites simultaneously, ensuring all of your sites are always on the latest versions of ACC.
Technical Specifications	Compatible ACC Platform	ACC 7.10 or later is required to connect ACC sites to Avigilon Cloud Services.
	Compatible ACC Mobile Platform	ACC Mobile 3 App is required to support remote access via a mobile device and to receive analytic alarms from ACC.

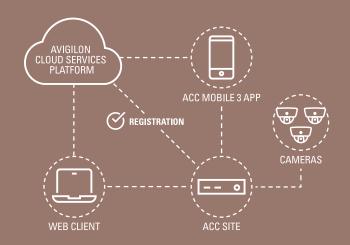

#### **KEY FEATURES**

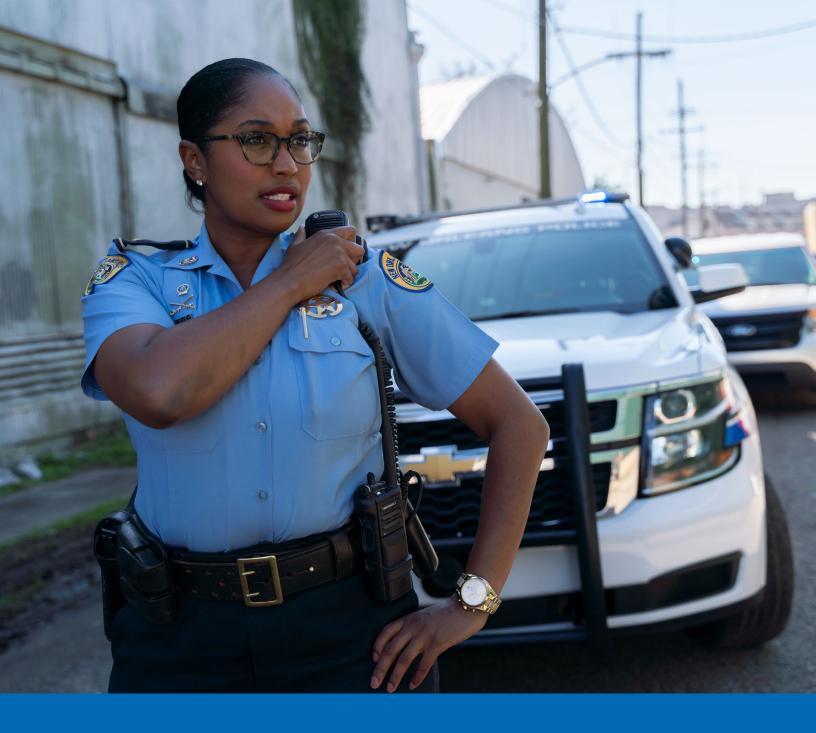

The ACS platform enables a modern cloud-connected user experience, accessible without installation from a web browser. It lays the foundation for ACC customers to connect to the cloud and take advantage of capabilities and features that provide centralized access across distributed systems.

Our platform provides for the delivery of value-add services, helping to improve your up-time, and enhance productivity, while also strengthening your security. The ACS platform simplifies the management of physical security systems for customers with multi-site facilities and distributed security systems from anywhere.
