HYBRID AND VIRTUAL TRAINING WITH A HUMAN CONNECTION

The hybrid workplace changes the where and when of work, but learning and development (L&D) teams must ensure that employee training and development remains front and center in their organizations. X2O OneRoom offers corporate L&D teams a more human way to reskill, onboard, coach and recognize their employees to drive productivity and learning across a hybrid workforce.

ACCOMMODATING FLEXIBLE TRAINING

Enrich your employees' learning experience and deliver better outcomes with X2O OneRoom.

- Remove geographic limitations to recruit and onboard new talent

- Equalize the learning experience for in-room and remote attendees

- Host guest speakers virtually without sacrificing engagement

- Evolve core values and improve organizational culture

- Improve the human connection for an increase in retention and learning success

"94% of learning & development professionals believe that employees who learn together are more successful"

CREATE IMMERSIVE AND FLEXIBLE TRAINING SPACES

ENGAGE

OneRoom training room creates a hybrid learning environment aimed at supporting an organization's coaching, mentoring, onboarding and training needs. OneRoom brings both in-room and remote learners together with advanced features which includes dedicated camera streams, high-quality directional audio and integrated collaboration tools to keep attendees motivated and engaged.

A training specialist welcomes remote company managers into an immersive training session.

LEARN

OneRoom facilitates learning and supports a range of learning styles. Integrated learning features, such as an interactive whiteboard and smart annotations for images, video, and web pages, are accessible during each session and stored for later study. This is invaluable for learners to refer back to source documentation with comments and analysis and helps reinforce key learnings, objectives and discussions. OneRoom also follows LTI standards to interface with LMS platforms.

UNDERSTAND

Engaging discussions complimented with a range of digital collaboration tools allow attendees to use a range of approaches to achieve learning outcomes. OneRoom's flexible toolset empowers instructors to form breakout groups on the fly, each with a unique whiteboard and audio stream among members, and bring the wider group back for discussions together creating dynamic, productive sessions.

X2O OneRoom features an integrated whiteboard with smart annotations that can be written over any type of media.

MEASURE

Engagement and participation levels are key to optimize not only future training sessions but to monitor learning performance. OneRoom training room has an integrated analytics dashboard that enables teams to measure progress and attendance as well as the effectiveness of hybrid learning sessions.
