X2O media

X2O Room Scheduling

Complete solution covering hardware
and software to manage meeting room
signage, leveraging the power
of the X2O Platform.

STREAMLINE THE ROOM BOOKING PROCESS

Improve space utilization and eliminate confusion about meeting room booking in today's busy corporate environment.

X2O ROOM SCHEDULING

X2O Room Scheduling combines X2O Media's robust content management system, remote device control and integration with market leading calendar management systems, including MS Exchange and Outlook 365 – making it an ideal solution for enterprise deployments. Through an intuitive interface, powered by the X2O Platform, the solution displays room status, schedule and meeting information in real time. With on-the-spot capabilities, employees can book an available room directly on the all-in-one touchscreen.

ROOM MANAGEMENT AND SCHEDULING

View meeting details, room availability and book an open room directly from the touchscreen. A check in and out feature to start and end meetings helps maximize room availability if scheduled meetings are cancelled or end early.

REMOTE MONITORING AND CONTROL

The X2O Platform provides scalability and flexibility to manage screen content. Remotely monitor and control meeting room signs easily with the X2O Server.

HIGHLY CONFIGURABLE CONTENT

The fully customizable solution provides the ability to configure the color palette, logo, fonts and background. Users can create playlists to show branded content alongside the meeting room schedule including employee communications, weather, news and alerts.

COMPATIBLE WITH MULTIPLE PLATFORMS

Our software solution runs on any touchscreen supporting the X2O Player, including Android, Windows and iOS. X2O Media offers a full solution, including hardware with the X2O Meeting Room Sign which was designed specifically for this scenario.
